Info notes/Questions

We use this booklet to ensure that the treatment and accompanying activity run as smoothly as possible.

It contains all kinds of important information regarding:

- a range of questions and comments
- medication (changes - instructions)
- problems/observations
- wound care (and progression)
- investigations
- hospital admission
- etc.

It allows you to pass on information to each other. We therefore request that you bring this file to every peritoneal dialysis appointment.
